

- [Getting Started](#)
- [Prerequisites](#)

Getting Started

First, run the development server:

```
npm run dev
# or
yarn dev
# or
pnpm dev
# or
bun dev
```

Open <http://localhost:3000> with your browser to see the result.

Prerequisites

Before running this project, make sure you have the following installed and set up:

- Ganache: Download and run Ganache. Ganache provides a local Ethereum blockchain for development purposes. You can download it from [here](#).
- Environment Variables: Create a `.env` file in the root directory of your project. Add the following environment variables to the file:
 - `MONGODB_URI`: Your MongoDB connection URI.
 - `TOKEN_SECRET`: A secret key for JWT token generation.
 - `EMAIL_USER`: Your email address for sending emails.
 - `EMAIL_PASS`: Your email password.
- Mailtrap: This project uses Mailtrap for email testing. Sign up for Mailtrap and obtain your SMTP credentials. You can sign up [here](#).
